

AIRRAIDER™ FOR RADON IN WATER

433 & 433-1

211 & 321

NEW! EZ95

Model	Blower	System Voltage	Plumbing Connection*	Recommended Flow Rate (GPM)	Radon Reduction	Tank Dimensions
433	.5 hp, 15V/5.0 amp or 230/2.5 amp	115V or 230V UL Listed Control Panel	3/4"	up to 15*	up to 99%+	35"H x 31.25"W x 19.75"L
433-1	.5 hp, 15V/5.0 amp or 230/2.5 amp	115V or 230V UL Listed Control Panel	1"	up to 20*	up to 99%+	35"H x 31.25"W x 19.75"L
211	.11 hp, 115V/1.2 amp or 230/2.5 amp	115V	3/4"	up to 7	up to 85%+	35"H x 31.25"W x 19.75"L
321	.11 hp, 115V/1.2 amp or 230/2.5 amp	115V	3/4"	up to 10	up to 95%+	35"H x 31.25"W x 19.75"L
EZ95	.21 hp, 115V/5.7 amp	115V	3/4"	up to 7	up to 95%+	36.37"H x 25.65"W, 25.71"L* *Includes internal pump

*(bypass not included)

Manufactured by:

 3 Saber Way

Distributed By:

AIRRaider™ Diffused Bubble Aeration Systems

All AIRRaider™ Systems have been tested and proven effective. Design features include:

- Small diameter vent line (2")
- Design for remote air intake
- Double-wall foam-insulated tank (will not sweat)
- All materials meet standards for drinking water use
- Easy maintenance for years of effective performance

*U.S. Patent #5,614,086

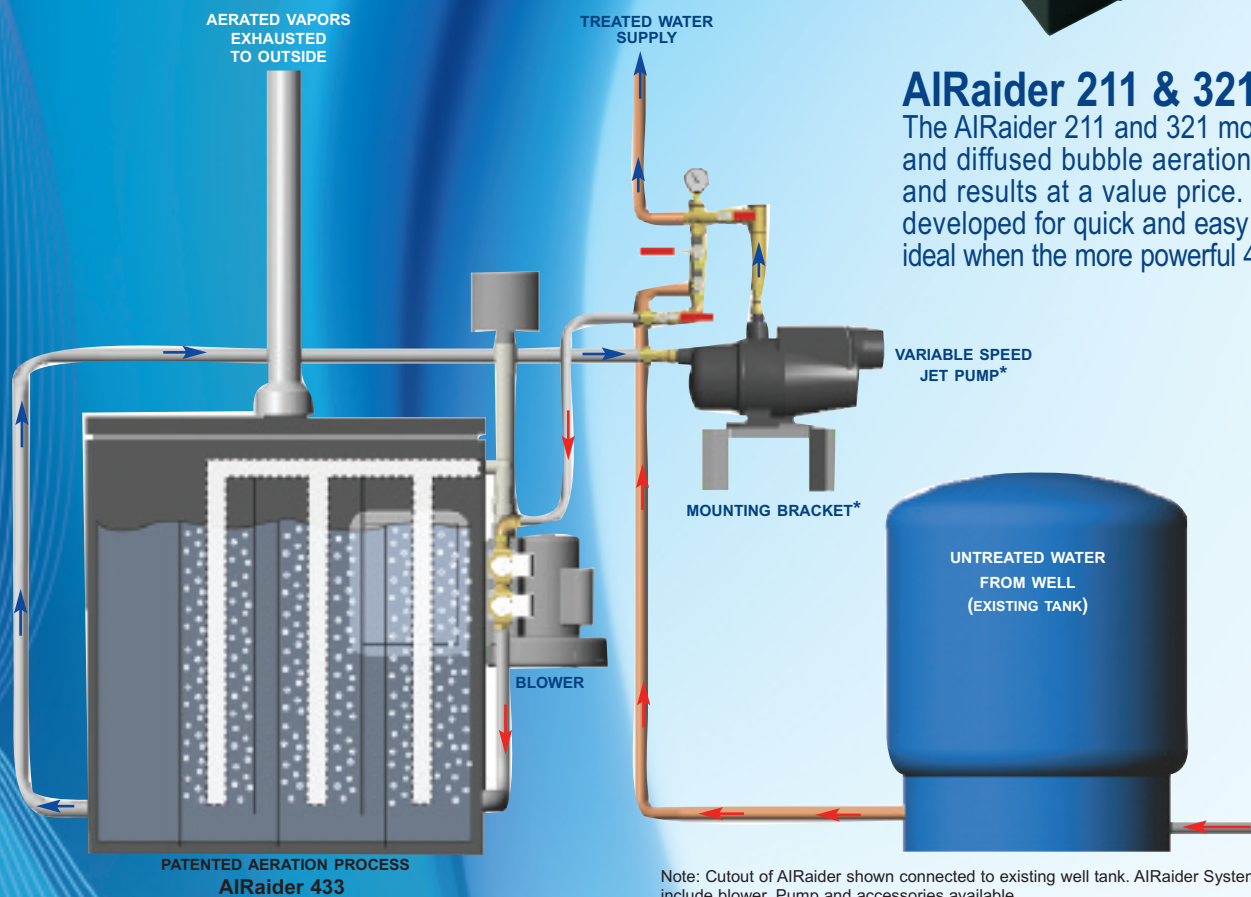

AIRRaider 433

The AIRRaider 433 successfully and dependably removes radon and VOCs from well water through a unique multi-stage aeration method. For over 14 years it has been the standard by which other aeration equipment is measured.

AIRRaider 211 & 321

The AIRRaider 211 and 321 models combine spray and diffused bubble aeration for the best quality and results at a value price. These models were developed for quick and easy installation and are ideal when the more powerful 433 is not required.

Note: Cutout of AIRRaider shown connected to existing well tank. AIRRaider Systems include blower. Pump and accessories available.

* Optional components. Repressurization packages and accessories vary.

The U.S. Environmental Protection Agency has designated aeration as the Best Available Technology for reducing radon in well water.

AIRRaider™ Systems strip the following from water:

- Radon
- Benzene
- Dichloroethane
- Trichloroethylene
- Vinyl Chloride
- Carbon Dioxide (elevates pH)
- Methyl-t-butyl (MTBE)
- Carbon Tetrachloride
- Toluene
- Trihalomethanes (THMs)
- Hydrogen Sulfide
- And many more...

NEW!

AIRRaider™ EZ⁹⁵
New Design! New Features!

• Negative Pressure

The EZ⁹⁵'s unique design maintains a negative pressure to avoid radon leakage into the living area.

• Fail Safe

An audible alarm warns of potential overflow by sounding if the water level is too high; the alarm also sounds if the aeration process is interrupted.

• Total Package

The EZ⁹⁵'s fully integrated internal repressurization pump makes installation easy. No external repressurization system necessary.
