## PARTNER SPOTLIGHT:

**J.B. Shearer**  
**Professional House**  
**Doctors, Inc.**

*"I've been installing RadonAway fans since I was of single digit age. For more than 20 years, I've seen our company grow alongside theirs.*

*It's a small point of pride to know that my company, through buying RadonAway fans, has helped their company grow, and my money is going to a company that is helping better the radon industry and helping further our cause.*

*Some people do radon work to make extra money. Some do it because they believe in*

## PRODUCT SPOTLIGHT: **Energy Efficient RP140**

*"When Only The Best Will Do."*

We are pleased to announce that our RP140 Radon Fan was the only fan made specifically for radon chosen by Energy Star® as a Most Efficient 2017 product.

The RP140 is known among the radon industry for its superior quality, ultra-quiet operation, double snap sealing, and its water-hardened motorized impeller. The RP140 also takes energy efficiency in a radon system to the next level.

Energy Star® Most Efficient is "a new distinction that recognizes products that deliver cutting edge energy efficiency along with the latest in technological innovation. It is an award that truly represents the best of ENERGY STAR".

**Learn More** about the RP140 and check out it's page on the **ENERGY STAR website**.

## BUSINESS TIP:

### **Peace of Mind with Air Flow Alarms**

Mitigation standards require a visual monitor that allows the homeowner to determine that the fan is operating. For some homeowners, a U-Tube alone is not enough. The RadonAway Air Flow Alarm

mounts directly onto the pipe and indicates a low or no air flow situation through a flashing light and audible buzzer.

Whether the homeowner is a worrier who wants to be

helping save the lives of thousands of people. Working with a company that proves they also care about the latter has been a joy.

There's also lots of little things that are great. For instance, when we can call to order more fans and they know just who we are when they pick up the phone. Having a company with a personal relationship like that doesn't make us feel like we are buying a product from a huge company, but a friend.

I hope for another 20 years with a company who has proven they really care."

- J.B. Shearer

able to evaluate the fan's operation constantly, forgets to check periodically on the system, or is simply confused by the U-Tube, the Air Flow Alarm is a great way to provide them with peace of mind.

## RADONAWAY NEWS:

### January Conferences and Trade Shows

One of our favorite ways to keep up with all of our friends and partners across the country is to visit with them during national trade shows, conferences, expos, and meetings. We're having a record year of travels at over 30 planned shows for 2017. In January alone, we traveled to seven different shows!

We've had some incredible feedback from you all on site and also from those following our adventures on **our facebook page**. We're looking forward to getting you more photos and live updates this Spring as we travel to the EPA region shows and meetings.

Don't forget - **we love having visitors here in Ward Hill, MA too!** Come to our quaint farming community and greet our neighbors (the cows across the street!) on your way to check out our facilities and how the #1 fans in the radon industry are made.

## RADON IN THE NEWS:

### Help Save Lives with Amazon Smile

Did you know that you can support radon awareness efforts every time you shop on Amazon without paying a single extra penny? AmazonSmile is an easy way to support a charitable organization, like **Cancer Survivors Against Radon (CanSAR)**, when you shop on Amazon. You'll find all the same low prices on everything you want to order, and Amazon will donate a portion of your order to your charity.

To donate part of your Amazon purchase to CanSAR,

simply go to [smile.amazon.com](https://smile.amazon.com), search for and select "Cancer Survivors Against Radon", and then carry on with your normal shopping experience. Amazon will donate 0.5% of your purchase to CanSAR, again, at no extra cost to you! Every bit counts and helps save lives.
