Increase your bottom line with Super V by HomeAire.

- Captures 99.99% of ultra-fine particles at .007 microns
- Greater than Merv 16 efficiency with half the pressure drop
- 40x more efficient than HEPA
- Filtration Unit CFM Capacity 2000 CFM

Super V (P/N 28525) contains a patented DFS Technology (Disinfecting Filtration System), which is unlike anything else available on the market. It's the Gold Standard for protecting families from airborne allergens, gases, and volatile organic compounds.

choice for you, your customers, and the environment.

Radon Pro Sealant

The Super-V is easily installed outside of the furnace's blower, resulting in lower pressure drop, and higher energy savings. Its technology is implemented at the Hyatt, Hilton, Cleveland Clinic and is now available for residential use.

Detroit Zoo + Motivated Radon Pros/Do-gooders = What?

Answer: A successful ALA Lung Force Walk Event! Peak Environmental of Michigan and RadonAway co-sponsored the Detroit event where both the animals and enthusiastic attendees, were equally seen and heard. Peak Environmental's Nara Scott, took the lead in educating attendees on the importance of professional Radon Testing and Radon Mitigation. The Peak team also handed out helpful Radon information and Radon Test Kits at an informative table.

You too can join the Force! Visit www.radonaway.com/lungforce to learn more or email Amanda Sanzo at asanzo@spruce.com if you'd like to register a team.

Thank you for making RUGS a record-breaking event!

This year with both the classroom and live webinar combined, we had more than 110 attendees - our biggest audience for RUGS ever!

We thank you for your participation and feedback. We're already looking forward to topping this next year with new courses and topics.

"The webinar was great and I truly appreciate the opportunity to have been included in it."

"Very informative and useful course! Your entire team is top shelf and as always reflects your products!"

**Radon Measurement
Nov 6-7; 8:30-5:30
Denver, CO**

Certification Preparation
16 NRPP & ASHI CE Credits
\$229 (discounted from \$299)

This 2-day radon measurement entry-level course is required for Measurement certification. It prepares you for and is a prerequisite to the National Radon Proficiency Program (AARST-NRPP) or National Radon Safety Board (NRSB) exam, which is NOT INCLUDED in the course fee. If you wish to take the NRPP exam, which will be available immediately after the second day of the course, please register separately.

Course Instructor: Matthew Hendrick, Senior Training Specialist
Course Location: RadonAway Denver, 700 Mississippi Ave., E2. Denver, Colorado

**We're your biggest fans...
And we'd like to show everybody why.**

You work hard in the field every day protecting people from radon and we appreciate and applaud your efforts. The final reward has to be leaving a clients home knowing they are safe from radon, right?

Lets capture the moment and share your quality workmanship with the world! All you need to do is take a cell phone picture of your finished work and send it to us at: marketing@spruce.com. We'll share your photos online and remind the public that you truly are the industry's best radon providers.
