

FRESH AIR INJECTION/MAKE UP

Enhanced ventilation for better indoor air quality

Bringing in fresh air is a priority for creating a healthy indoor environment. Combustion dryers, furnaces and water heaters require fresh air to operate properly. Many of today's homes are built so tightly that air must be introduced by a fan. Spruce inline fans offer excellent performance with minimal sound.

Made in USA with U.S.
and imported parts.

ETL Listed

All Spruce™ inline
radon fans are covered
by our 5-year, hassle-
free warranty.

Features

- Rated for commercial or residential use
- Rated for continuous operation
- Multiple intake locations
- Plastic fans rated for indoor & outdoor (Metal fans for indoor use only)
- Five-year warranty

RB275

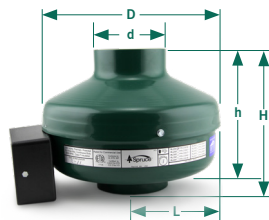

RL/RV/RB SERIES

TECHNICAL SPECIFICATIONS

The Home Ventilation Institute (HVI) recommends a ventilation rate based on the size of the room. To enhance efficiency and energy savings while injecting needed make-up air, Spruce fans can be set to turn on automatically when appliances are in use by installing an appropriate switching mechanism.
