Healthy homes start here.

Introducing the world's most efficient whole-house air cleaner

The world needs healthy homes

Nearly six million households live with moderate to severe home health and safety hazards

Approximately 7 in 10 homes have water damage and mold

People who are exposed to mold are 30% to 50% more at risk of asthma, coughing, bronchitis and respiratory infections

In a recent survey, 70% of home-buyers ranked a home's "health" as equally or more important than aesthetics, longevity and cost. At HomeAire, we couldn't agree more. That's why we believe in the Super V whole-house air cleaner. Installed at your home's point of entry, this revolutionary machine uses patented DFS filtration technology to circulate fresh, contaminant-free, air throughout your entire home. And it's installed outside of your furnace's blower, resulting in lower pressure drop, and higher energy savings.

- Point of entry Medical grade air cleaning
- > Merv 16 efficiency with half the pressure drop
- Lock tight filtration seal - all air must pass through DFS Filter
- Award Winning Patented DFS Technology
- Deactivates mold, viruses, fungi and bacteria inside the filter
- Reduced pressure drop makes it the most energy-efficient whole-house air cleaner
- Up to 3 years of filter life
- 211 square feet of media

Air Flow Rate	Differential Pressure
2000 cfm	0.24 inWG
1600 cfm	0.19 inWG
1400 cfm	0.15 inWG
1200 cfm	0.11 inWG
1000 cfm	0.08 inWG
600 cfm	0.03 inWG
400 cfm	0.01 inWG

Power consumption - 4 watts
