The RadonAway RSA1 Radon System Alarm is more than just an alarm. It is a required radon system component that adds value as an important safety feature when installed. The RSA1 also provides a future income stream when you tie it into a service program that includes system inspection and retesting.

Added Value At a low additional cost, homeowners can be assured that they will be alerted if their radon system is not operating properly. As a safety feature and a system requirement it provides you with an add-on item that sells itself.

Return Business As part of a radon system service program, your one-time system installation customer becomes a long-term customer.

Mitigation Standard Compliance *Soil Gas Mitigation Standards for Existing Homes* (ANSI/AARST SGM-SF-2017) includes "Active Notification Monitors Required" (section 9.2.2), which states that "capacity for active visual and/or audible notification in the event of ASD (Active Soil Depressurization) fan or other mechanical failure shall be provided to actively warn occupants or other individuals responsible for monitoring."
